

**DİLER YATIRIM BANKASI  
ANONİM ŞİRKETİ**

**UNCONSOLIDATED FINANCIAL STATEMENTS  
AND INDEPENDENT AUDITOR'S REPORT  
FOR THE YEAR ENDED  
DECEMBER 31, 2019**

To the Board of Directors of Diler Yatırım Bankası Anonim Şirketi,

**A) Report on the Audit of the Consolidated Financial Statements**

**1) Opinion**

We have audited the financial statements **Diler Yatırım Bankası Anonim Şirketi** ("the Company"), which comprise the statement of financial position as at December 31, 2019 the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements for the Company as of 31 December 2019 as the financial situation and on the same date at the end of the fiscal year of financial performance and cash flows for Turkey Accounting Standards ("TAS") in all relevant aspects.

**2) Basis for Opinion**

We did the audit, Public Oversight, Accounting and Auditing Standards Agency ("ASA") released by Turkey Auditing Standards, which is part of the Independent Audit Standards ("IAS") was carried out accordingly. Our responsibilities within the scope of these Standards are explained in details in our report Responsibilities of Independent Auditor for Independent Auditing of Financial Statements, section. We hereby declare that we are independent from the Company in accordance with the Code of Ethics for Independent Auditors issued by the POA ("Ethical Rules") and independent auditing of financial statements. Other responsibilities regarding the Code of Ethics and the ethics covered by the legislation have also been fulfilled by us. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

**3) Significant Audit Matters**

Without affecting the outcome of the report, it was deemed necessary to draw attention to the following issues.

i- The Bank has extended 89% of its cash loans and 98% of its non-cash loans to associated companies as of the balance sheet date.

ii- Diler Yatırım Bankası A.Ş. has received an exemption on the provisions within the scope of the 10th, 11th, 13th and 15th articles of the Regulation regarding the classification of loans.

**4) Other Audit Matters**

The audit of the financial statements of the Bank for the twelve-month period ending on December 31, 2018 and the independent audit of the financial statements for the year ending on December 31, 2018 were carried out by another independent audit firm. The previous independent audit firm expressed a positive opinion in the independent audit report dated 29 March 2019 regarding the financial statements of 31 December 2018.

**5) Key Audit Matters**

Key audit matters are, in our professional judgment, the most important issues in the independent audit of the current period financial statements. Key audit issues have been handled within the framework of the independent audit of the financial statements as a whole. In forming our opinion on the financial statements, and we do not express a separate opinion on these issues.

Subject of Significant Audit	How the Subject Conducted in our Audit
<p>The Bank's Receivables from Loans and Leasing Transactions as of the end of December 31, 2019 balance amounts to TL 91.369 Thousand. The Bank has loans followed in non-performing loans amounting to TL 1.201 thousand and a special provision amount of TL 1.201 thousand related to these. The Bank accounts for the classification and measurement of the Loans balance according to the "Regulation on the Procedures and Principles Regarding the Determination of Loans by Banks and the Provisions to be Allocated for Them". Whether the bank's loan balance is in the status of overdue / non-performing loan is evaluated by the management of the Bank and according to the provisions specified in the regulation. Here, there may be errors in the classification due to the management evaluation not being done correctly or the wrong application of the provisions of the regulation. There may be an incorrect allocation of impairment due to the relevant classification error and also due to the non-compliance with other provisions in the regulation, therefore loans have been identified as the key audit subject.</p>	<p>The procedures we apply in order to control the classification of loans and receivables of the Bank in accordance with the BRSA legislation and the adequacy of the related provisions are presented below:</p> <p>We have tested and evaluated the design, implementation and operational efficiency of the controls that we consider important regarding the processes for detecting impairment of loans. In addition, in order to determine whether the loans were impaired or not, a loan file review study was carried out on the samples we selected to determine the impairment by evaluating the Bank's policies and the payment capabilities of loan customers were reviewed. The classification of loans was checked by performing tests on the sample set we determined based on our professional experience and audit methodology, and the compliance of the recalculation of special provisions for loans with the legislation was tested on a sample basis. The compliance of the items subject to general loan provision calculation and the provision rates applied to them with the legislation has been tested. The compliance of the explanations and footnotes regarding the loans with the audited financial statements have been checked.</p>

**6) Responsibility of the Banks Board of Directors**

The Bank's Board of Directors is responsible for establishing and maintaining effective internal control systems relevant to the preparation and presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies in accordance with the Regulation on Accounting Applications for Banks and Safeguarding of Documents

published on the Official Gazette no.26333 dated November 1, 2006, Turkish Accounting Standards, Turkish Financial Reporting Standards and the statements and guidance published by the Banking Regulation and Supervision Agency (BRSA) on accounting and financial reporting principles.

Those responsible for top management are responsible for the oversight of the Bank's financial reporting process.

## 7) Responsibility of the Authorized Audit Firm

The responsibilities of independent auditors in an independent audit are as follows:

Our aim is to obtain reasonable assurance as to whether the financial statements as a whole contain material misstatement due to error or fraud, and to prepare an independent auditor report containing our opinion. Reasonable assurance given by the BRSA as a result of an independent audit conducted in accordance with the "Regulation on the Independent Audit of Banks" published in the Official Gazette No. 29314 dated April 2, 2015 and the IAS's; it is a high level of assurance but does not guarantee that an existing material misstatement will always be detected. Inaccuracies may be due to error or fraud. If the misstatements, individually or collectively, are reasonably expected to affect the economic decisions of financial statement users based on these statements, these misstatements are considered material.

We use our professional judgment and maintain our professional skepticism throughout the independent audit as required by the "Regulation on the Independent Audit of Banks" published by the BRSA in the Official Gazette No. 29314 and the IAS's. We also:

- Errors in the financial statements or welded cheating "major mistake" risks are identified and evaluated; audit procedures that are designed and implemented in response to these risks and adequate and appropriate audit evidence to form the basis for our opinion is obtained. (The risk of not detecting a significant error caused by fraud is higher than the risk of not detecting a significant error arising from the error, as the fraud may involve misconduct, fraud, intentional negligence, false statement or internal control violations.)
- Internal control related to the audit is evaluated not in order to express an opinion on the effectiveness of the Bank's internal control, but in order to design audit procedures appropriate to the situation.
- The appropriateness of the accounting policies used by the management and the accounting estimates made and the related disclosures are evaluated.
- Based on the audit evidence obtained, a conclusion is reached about whether there is a significant uncertainty regarding events or conditions that may cause serious doubt about the Bank's ability to continue its continuity and about the appropriateness of the management to use the continuity principle. If we come to the conclusion that there is a significant uncertainty, we need to draw attention to the relevant explanations in the financial statements in our report or, if these explanations are insufficient, we should give an opinion other than positive opinion. Our conclusions are based on the audit evidence obtained until the date of the independent auditor's report. However, future events or conditions may terminate the continuity of the Bank.

- It is evaluated whether the financial statements, including the explanations, reflect the general presentation, structure and content of these tables in a way that will enable the presentation of the underlying transactions and events in a manner that provides a fair presentation.

Among other things, we report the planned scope and timing of the independent audit as well as the significant audit findings to those responsible for the senior management, including the significant internal control deficiencies we identified during the audit.

We have reported to those responsible for senior management that we comply with ethical requirements regarding independence. In addition, we have communicated all relations and other issues that may be considered to have an impact on independence and, if any, measures to those responsible for senior management.

Among the issues notified to those responsible for senior management, we identify the most important issues in the independent audit of the consolidated financial statements for the current period, ie the key audit issues. In cases where the legislation does not permit the disclosure of the matter, or in exceptional cases where it is reasonably expected that the negative consequences of public disclosure will be exceeded by the public interest, we may decide not to report the matter in our independent auditor report.

#### B) Other Liabilities Arising from the Legislation

In accordance with the fourth paragraph of Article 402 of the TCC; In the accounting period of 1 January - 31 December 2019, no significant matter has been observed regarding the incompatibility of the bookkeeping order, financial statements of the Bank with the provisions regarding financial reporting of the TCC and the Bank's articles of association.

In accordance with the fourth paragraph of Article 402 of the TCC, the Board of Directors submitted to us the necessary explanations and provided the requested documents within the context of the audit.

The responsible auditor who executes and finalizes this independent audit is Kudret BARAN.

Brief explanation on the differences between the consolidation transactions performed under the Communiqué on Preparation of Banks' Consolidated Financial Statements and the consolidation transactions performed in accordance with the Turkish Accounting Standards, as well as the corporations subjected to full consolidation or proportionate consolidation, equity accounting or the corporations which are not covered by such three categories:**

The Bank is not obliged to issue Consolidated Financial Statements as of 31 December 2019.

**VII. The transfer of own funds between the Bank and its subsidiaries immediately in front of or reimbursement of actual or potential liabilities, actual or legal obstacles:**

The Bank has no subsidiaries as of December 31, 2019.

## **SECTION TWO**

### **Unconsolidated Financial Statements**

- I.** Balance Sheet
- II.** Off-balance Sheet Items
- III.** Income Statement
- IV.** Statement of income and expense items accounted in equity
- V.** Statement of changes in shareholders' equity
- VI.** Cash Flow Statement
- VII.** Statement of profit distribution

(\*)General Assembly is the authorized body of the Bank regarding the profit distribution of the current period and the decision regarding to profit distribution will be taken at General Assembly meeting.

## **SECTION THREE**

### **ACCOUNTING POLICIES**

#### **I. Basis of Presentation**

##### **1. The related disclosures and footnotes of Financial Statements in accordance with the regulations**

The unconsolidated financial statements are prepared by the Banking Regulation and Supervision Agency ("BRSA") and the provisions of the Regulation on the Procedures and Principles Regarding the Accounting Practices of Banks and Retaining Documents published in the Official Gazette dated November 1, 2006 and numbered 26333 regarding the Banking Law No. 5411, accounting and financial reporting regulations published on the principles, notification, explanation and Public Oversight circulars and issues not regulated by them, Accounting and Auditing Standards Board ("UPS") by which was enacted Turkey Accounting Standards ("IAS") and Turkey financial reporting Standards ("TFRS") (all of them "BRSA Accounting and Financial Reporting Legislation"). The format and content of the unconsolidated financial statements to be disclosed to the public and their explanations and footnotes are in accordance with the "Communiqué on Financial Statements to be Disclosed to the Public by Banks and the Related Disclosures and Footnotes" and "Communiqué on Public Disclosures on Risk Management by Banks" and the communiqués bringing additional and amendments to them. It was prepared as. The Bank keeps its accounting records in Turkish Lira in accordance with the Banking Law, Turkish Commercial Code and Turkish tax legislation.

The financial statements have been prepared in TL on the basis of historical cost, except for the financial assets and liabilities shown with their fair values.

#### **Explanations on TFRS 9 Financial Instruments Standard:**

TFRS 9 Financial Instruments" standard regarding the classification and measurement of financial instruments published by the Public Oversight Accounting and Auditing Standards Authority in the Official Gazette dated 19 January 2017 and numbered 29953, effective from January 1, 2018, "TAS 39 Financial Instruments: Accounting and Measurement" Has been started to be implemented instead of the standard.

All financial assets within the scope of TFRS 9 should be recognized at their amortized cost or fair value after initial recognition. In particular, debt instruments held within a business model that aims to collect contractual cash flows and debt instruments with contractual cash flows that include only principal and interest payments on principal balance are usually measured at amortized cost on subsequent accounting. The overall fair value change of debt instruments held in a business model that holds both contractual cash flows for the purpose of collecting and selling financial assets, and debt instruments that generate cash flows that include only principal and principal balance payments at certain dates, are generally subject to other comprehensive income, measured by projecting. All other debt instruments and equity instruments are measured at their fair values at the end of subsequent accounting periods. In addition, in accordance with TFRS 9, companies can make an irreversible choice to present the changes in the fair value of the investment made in the equity instrument not held for commercial purposes in other comprehensive income. Dividends from such investments are recognized as profit or loss, unless clearly recovering part of the cost of the investment.

Within the framework of the Regulation on the Procedures and Principles Regarding the Classification of Loans and the Provisions to be Set aside with the decision of the Banking Regulation and Supervision Board dated 21 December 2017 and numbered 7650, the

provisions of the Bank will be replaced by the 10th, 11th, 13th of the Regulation instead of TFRS 9. Separation is allowed under Articles 3 and 15. In this context, the Bank did not apply the provisions of TFRS 9 effective as of 1 January 2018 regarding the measurement of provisions.

### Classification and Measurement

As of January 1, 2018, the Bank management evaluated the business models regarding which categories of financial instruments will be shown in TFRS 9.

As explained in Footnote I.e., unlisted stocks that are shown at fair value and classified as available-for-sale financial assets: These shares are classified as financial assets at fair value through other comprehensive income in accordance with TFRS 9.

Trade and other receivables shown at amortized cost (Footnote I.f): These are held within the scope of the business model that aims to collect contractual cash flows that include only principal and interest payments on the principal balance.

All other financial assets and liabilities will continue to be measured as currently accepted under TAS 39.

### Impairment:

In accordance with the "Regulation on the Procedures and Principles of the Classification of Loans and the Provisions to be Allocated for These", which was published in the Official Gazette dated 22 June 2016 and numbered 29750, and entered into force as of January 1, 2018, within the framework of paragraph (6) of Article 9 of the Bank Regulation, allocated its provisions within the scope of general provisions articles (articles 10, 11, 13 and 15) of the Regulation instead of TFRS 9 to be set aside by banks that do not apply TFRS 9.

### Explanations on TFRS 15 Revenue from Customer Contracts Standard:

TFRS 15 Revenue from Customer Contracts standard provides a single and comprehensive model and guide for the recording of revenue, replacing the TAS 18 Revenue standard. The standard entered into force on January 1, 2018 and does not have a significant impact on the financial statements of the Bank.

### TFRS 16 Leasing

TFRS 16 Leasing Transactions standard eliminates the current practice for lessees, the dual accounting model of showing financial leasing transactions on balance sheet and operational leasing transactions off balance sheet. Instead, a single balance sheet-based accounting model is introduced, similar to current financial lease accounting. Accounting for lessees continues to be substantially similar to current practices. This standard will be valid for the annual accounting periods starting from January 1, 2019 and after, and it does not have a significant effect on the financial statements of the Bank.

The accounting policies followed in the preparation of the financial statements and the valuation principles used were determined and applied in accordance with the regulations, communiqués, explanations and circulars issued by the BRSA regarding the principles of accounting and financial reporting and, in the absence of a special regulation by the BRSA, within the scope of TAS / TFRS. These accounting policies and valuation principles are explained in the footnotes II and XXII below.

## **II. Strategy for use of financial instruments and foreign currency transactions**

### **Strategy for the use of financial instruments**

The Bank's core operations are composed of commercial financing and trading activities under investment banking business and commercial banking services excluding accepting deposits under the banking business.

The Bank has mainly funded itself with its equity, and the Bank's funds are invested in high return and low risk assets. The Bank avoids from major concentration on specific customer types, geographical and industrial segments. The Bank establishes conservative loan analysis and credit risk controls that enables the Bank to determine possible loan losses and take prompt actions accordingly. The Bank has planned to keep its liquidity ratio over industry averages that enable the Bank to fulfill all of its matured liabilities on time. If required, the Bank is able to fund itself from the Central Bank of Turkey ("CBT"), domestic and foreign banks within defined limits.

Off balance sheet risk areas are forward exchanges, composed of non-cash loans and liabilities.

The Bank finances its placements mainly with short, medium or long term borrowings from domestic and foreign banks, borrower funds and with its equity. The Bank's funds are utilized on overnight placements, investment in securities and loan .

The interest structure of the Bank's interest bearing assets is allocated to minimize the effect of interest rate fluctuations. In the same manner, the Bank aims to square its foreign currency position within legal limitations, to minimize the effect of currency fluctuations. Those transactions are performed within the limits that BOD has determined.

The foreign currency position is monitored in line with the legal limitations and the Bank's internal control regulations. The foreign currency position is managed considering the market conditions by determining the balance of different foreign currency types.

### **Foreign currency transactions**

Foreign currency transactions are translated to TRY at foreign currency rates on the transaction dates. Foreign exchange gains and losses arising from foreign currency transactions are recorded in the same period. At the end of the periods, foreign currency assets and liabilities evaluated with foreign currency purchase rates are announced by the Central Bank of Turkey and the differences are recorded as foreign exchange gains or losses in the income statement.

### **III. Forwards, options and other derivative transactions**

The derivative transactions of the Bank mainly consist of forward foreign exchange purchase and sale transactions. In addition, money and interest swaps, cross currency swaps, futures transactions and options are also performed, albeit infrequently. The Bank makes derivative products for the purpose of economically hedging and classifies them as "Financial Assets with Fair Value Differences Reflected on Profit or Loss".

Commitments arising from derivative transactions are recorded in off-balance sheet accounts at their contractual amounts. Derivative transactions are evaluated with their fair values in the periods following their registration and are shown in the balance sheet in derivative financial assets or derivative financial liabilities accounts, depending on whether the fair values are positive or negative. Differences that occur in the fair value of derivative financial assets as a result of the valuation are accounted under profit / loss from derivative financial transactions in the commercial profit / loss item in the income statement. The fair value of derivative instruments is calculated by taking into account their fair value in the market or by using the discounted cash flow model.

### **IV. Interest income and expenses**

Interest income and expenses are recognized on an accrual basis using the effective interest method (the rate that equates the future cash flows of the financial asset or liability to its current net book value).

### **V. Fees and commissions:**

Fees and commissions income and expenses are recorded on accrual basis. Fees and commissions paid for borrowed funds are recognized as transaction costs and amortized by using "effective interest rate method". Other fees and commission expense relates mainly to transaction and service fees, which are expensed as the services are received.

Loans and receivables in accordance with the relevant legislation has become non-performing loans, interest accruals and accruals are reversed, are recognized as interest income only when collected.

## **VI. Financial Assets**

A financial asset is any asset that is cash, an equity instrument of another entity, a contractual right to receive cash or another financial asset from another entity; or to exchange financial assets or financial liabilities with another entity under conditions that are potentially favorable to the entity. Financial assets are classified in four categories; as financial assets at fair value through profit or loss, investment securities held-to-maturity, investment securities available for sale, and loans and receivables.

A financial asset is recognized initially at its cost including the transaction costs.

### **1. Business Model aiming to hold financial assets in order to collect Contractual Cash Flows**

Financial assets held within the scope of a business model that aims to collect contractual cash flows are managed in order to collect the contractual cash flows that will occur during the life of these assets. Although the objective of the business model is to hold financial assets to collect contractual cash flows, not all of these instruments need to be held to maturity. Therefore, even in situations where there are financial asset sales or expected to occur in the future, the business model may be a model that aims to hold financial assets to collect contractual cash flows. Financial assets held under this business model are measured at amortized cost if the terms of the contract for the financial asset pass the cash flow test, which includes only principal and interest payments arising from the principal and principal balance, on the dates specified in the business model.

### **2. Business Model Aiming to Collect & Sell Contractual Cash Flows of Financial Assets:**

It is the business model that the bank keeps its financial assets for both collecting contractual cash flows and selling financial assets.

Financial assets held under this business model are accounted for under other comprehensive income if the terms of the contract for the financial asset pass the cash flow test that includes only principal and interest payments arising from the principal balance at the dates specified within the business model.

### **3. Other Business Models**

In case the Bank does not hold its financial assets within the scope of a business model aimed at collecting contractual cash flows or a business model aimed at collecting contractual cash flows and selling financial assets, these financial assets are measured by reflecting the fair value difference to profit or loss. Within the framework of its business model, the Bank makes its decisions on the basis of the fair value of the assets and manages the assets to obtain the aforementioned fair values. Therefore, if financial assets are held in order to obtain cash flows arising from their sales, the business model will result in the measurement of fair value changes by reflecting profit or loss.

### ***Measurement Categories of Financial Assets and Liabilities***

As of January 1, 2018, the Bank has classified all of its financial assets based on the business model used for the management of these assets. There are three methods for measuring financial assets in TFRS 9 Standard. These are;

- 1) Financial Assets Measured from their Amortized Cost
- 2) Fair Value Changes Measured in Other Comprehensive Income Financial Assets
- 3) Fair Value Change Financial Assets Measured in Profit or Loss

TFRS 9, paragraph 4 explains in detail how financial assets will be classified according to the methods explained in paragraph 1 and 2 above, and stated that the financial assets other than these should be classified by the method specified in Article 3.

#### **4. Financial Assets Measured from Amortized Cost:**

A financial asset is measured at amortized cost if the following two conditions are met:

- (a) the holding of the asset under a business model aimed at collecting contractual cash flows.
- (b) The contractual terms of the financial asset result in cash flows for making only principal and interest payments on the principal balance at specified dates.

Assets measured at amortized cost are loans and financial investments. Financial investments measured at amortized cost are accounted for with their discounted cost calculated using the effective interest method, after initial recording. Loans, on the other hand, are accounted for at their acquisition cost, and are valued at amortized cost using the effective interest method.

#### **5. Fair Value Changes Recognized in Other Comprehensive Income Financial Assets**

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- (a) the holding of the financial asset under a business model that aims to collect the contractual cash flows and sell the financial asset;
- (b) The terms of the contract for the financial asset lead to cash flows at certain dates that include only principal and interest payments arising from the principal balance.

Gains or losses arising from a financial asset measured at fair value through other comprehensive income, other than impairment gains or losses and foreign exchange gains or losses, are recognized in other comprehensive income until the financial asset is derecognized or reclassified.

#### **6. Fair Value Change Financial Assets Measured in Profit or Loss**

Pursuant to paragraph 4.1.4 of TFRS 9 Communiqué; If a financial asset is not measured at amortized cost or at fair value through other comprehensive income, it is measured at fair value through profit or loss. However, for certain investments in equity instruments that would normally be measured at fair value through profit or loss, an entity may irrevocably opt for the method of recognizing subsequent changes in fair value in other comprehensive income at initial recognition.

#### **Cash & Banks**

Cash and bank balances in foreign currency are valued over the current period end counter rate. The current value of the cash, the effective warehouse and the deposits in the bank in the balance sheet are the fair values of these assets on the date of registration.

### **Loans**

Loans are financial assets that are created by providing money, goods or services to the borrower, have fixed or determinable payments and are not traded in an active market.

The first records of the loans and receivables are made with their fair values including the acquisition costs and subsequently they are valued with their discounted values using the internal yield method. Fees, transaction expenses and other expenses paid for the assets received as collateral for the loans are reflected in the profit / loss accounts.

Individual and corporate loans monitored within cash loans are accounted according to their original balances in the accounts specified in the Uniform Chart of Accounts ("THP") and Prospectus.

Foreign currency-indexed personal and commercial loans are converted to Turkish Lira from the opening date and followed in Turkish Lira ("TL") accounts, and in the following periods, increases or decreases in the principal amount of the loan are recorded in the income statement, depending on whether the relevant period exchange rates are above or below the starting rates. recorded in foreign exchange profit / loss accounts.

Repayments are calculated at the exchange rate at the repayment date, the resulting exchange differences are reflected in the foreign exchange profit / loss accounts in the income statement.

### **Subsidiaries & Affiliates**

The Bank does not have any subsidiaries or affiliates.

## **VII. Impairment of financial assets:**

Financial asset or group of financial assets are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. If any such indication exists, the Bank estimates the amount of impairment. Impairment loss incurs if, and only if, there is objective evidence that the expected future cash flows of financial asset or group of financial assets are adversely affected by an event(s) ("loss event(s)") incurred subsequent to recognition. Events that may occur in the future are recognized even if the probability of a loss is high.

If there is an objective evidence that certain loans will not be collected, for such loans; the Bank provides specific and general allowances for loan and other receivables classified in accordance with the Regulation on Identification of and Provision against Non-Performing Loans and Other Receivables published on the Official Gazette no.26333 dated November 1, 2006. The allowances are recorded in the income statement of the related period.

## **VIII. Netting of financial instruments**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet date when there is a legally enforceable right of the Bank to net off the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

## **IX. Repurchase and sale agreements and securities lending**

Securities sold under repurchase agreements are recorded on the balance sheet in accordance with the Uniform Chart of Accounts for Banks. Accordingly, government bonds and treasury bills sold to customers under repurchase agreements are classified as "Investments Subject to Repurchase Agreements" and valued based on the Bank management's future intentions, either at market prices or using discounting method with internal rate of return. Funds received through repurchase agreements are classified separately under liability accounts and the related interest expenses are accounted on an accrual basis.

Securities purchased under resale agreements are classified under "interbank money markets" separately. An income accrual is accounted for the difference between the purchase and resale prices earned during the period.

## **X. Assets held for sale and discontinued operations**

Assets that meet the criteria for classification as held-for-sale assets are measured at their book values and depreciation process is stopped on these assets and these assets are presented separately in the balance sheet. In order for an asset to be classified as an asset held for sale, the asset (or the asset group to be disposed of) must be in a condition that is frequently encountered in the sale of such assets (or the asset group to be disposed) and can be immediately sold under customary conditions and the sales probability is high. In order for the probability of sale to be high, a plan for the sale of the asset (or the group of assets to be disposed) should be made by an appropriate management level and an active program should be initiated for the completion of the plan with the identification of buyers. In addition, the asset (or the asset group to be disposed of) must be actively marketed at a price compatible with its fair value. Various events or conditions may extend the completion of the sale for a year.

If the delay occurred due to events or conditions beyond the control of the company and there is sufficient evidence that the sales plan for the sale of the related asset (or the asset group to be disposed) is ongoing, the said assets continue to be classified as assets held for sale.

A discontinued operation is a division of a bank that is either disposed of or held for sale. Results for discontinued operations are presented separately in the income statement.

#### **XI. Goodwill and other intangible assets**

The Bank's intangible assets are composed of software and intangible rights.

Intangible assets are recognized at cost in compliance with the Turkish Accounting Standard 38 (TAS 38) "Intangible Assets".

The intangible assets purchased before December 31, 2004 are recorded at restated historical costs in accordance with inflation accounting method and the subsequent additions to December 31, 2004 are recorded at their historical purchase costs. The intangible assets are amortized using the declining balance method, which is one of the accelerated amortization methods, through their useful lives.

#### **XII. Tangible assets**

Tangible fixed assets that became active before December 31, 2004 are reflected to the financial statements with their inflation adjusted cost for the period from December 31, 2004, and assets that became active after December 31, 2004 with their initial purchase prices. Gains and losses arising from the disposal of tangible fixed assets are calculated as the difference between the net disposal proceeds and the net book value of the related tangible fixed asset. Regular maintenance and repair expenses incurred for tangible fixed assets are recognized as expense. There is no pledge, mortgage or any other encumbrance on tangible fixed assets. Depreciation is allocated according to the declining balances on the tangible fixed assets in the records of the Bank.

#### **XIII. Leasing activities**

Leasing activities are recorded in compliance with the Turkish Accounting Standard 17 (TAS 17) "Leasing activities".

In operating leases, the rent payments are charged to the income statement over the rent term on an accrual basis

#### **XIV. Provisions and Contingent Liabilities**

In the financial statements, a provision is made for an existing commitment resulted from past events if it is probable that the commitment will be settled and a reliable estimate can be made of the amount of the obligation. Provisions are calculated based on the best estimates of management on the expenses to incur as of the balance sheet date and, if material, such expenses are discounted for their present values. If the amount is not reliably estimated and there is no probability of cash outflow from the Bank to settle the liability, the related liability is considered as "contingent" and disclosed in the notes to the financial statements.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. Contingent assets are not recognized in financial statements since this may result in the recognition of income that may never be realized. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognized in the financial statements of the period in which the change occurs. If an inflow of economic benefits has become probable, the Bank discloses the contingent asset.

**XV. Obligations of the Bank concerning employee rights**

As per the existing labor law in Turkey, the Bank pension due to work resignation or and bad behavior to make payment at the end of the job for reasons other than the specified amount of staff in the financial statements yükümlüdür.ilişik, using the Bank's actuarial method "Turkey on the Benefits Employee Accounting Standards" (the " TMS 19 ") has been calculated and accounted for severance pay provision.

The main actuarial estimates used as of December 31, 2019 are as follows:

	<b>Current Period</b>	<b>Previous Period</b>
<b>Discount Rate</b>	% (0,28)	% (1,28)
<b>Estimated Rate of Entitlement to Severance Pay</b>	% 89,47	% 87,72

The Bank has made provision for the short-term benefits provided to employees within the scope of TAS 19 in its financial statements, which are discounted expected to be paid for the services provided by the employees during an accounting period.

## **XVI. Taxation:**

### **Corporate Tax**

Corporate earnings are subject to 22% Corporate Tax (2018: 22%). This rate is applied to the tax base to be found as a result of adding the non-deductible expenses to the commercial earnings of the companies, deducting the exemptions (such as participation earnings exemption) and deductions (such as investment allowance) specified in the tax laws. No further tax is paid if the profit is not distributed.

generate revenue through a permanent establishment or permanent representative in Turkey institutions with limited taxpayer from dividends paid to companies resident in Turkey (dividends) will not be withholding. Dividend payments made to individuals and institutions other than these are subject to 15% withholding tax. Addition of profit to capital is not considered as profit distribution and does not apply to withholding tax.

Institutions calculate temporary tax at the rate of 22% over their quarterly financial profits and declare it until the 10th day of the second month following that period and pay it until the evening of the 17th day. The temporary tax paid during the year belongs to that year and is deducted from the corporate tax to be calculated over the corporate tax return to be submitted in the following year. Despite the offset, if there is a prepaid tax amount left, this amount can be refunded in cash or offset against other financial liabilities to the government.

According to the Turkish tax legislation, financial losses shown on the declaration can be deducted from the corporate income for the period not exceeding five years. However financial losses can not be offsetted from last year's profits.

an application, there is no agreement with the tax authorities about the tax payable in Turkey. Corporate tax returns are submitted to the tax office affiliated to until the evening of the 25th day of the fourth month following the end of the accounting period. However, the authorities competent for tax inspection can examine the accounting records within five years, and the tax amounts to be paid may change if erroneous transactions are detected.

### **Deferred Tax**

Bank, an entity or between the book value and tax legislation determined in accordance with the tax basis of the liability for taxable temporary differences arising "Income Turkey Regarding Tax Accounting Standards" ( "IAS 12") reflects its records income taxes in accordance with the provisions. In the calculation of deferred tax, the legalized tax rates valid as of the balance sheet date are used in accordance with the current tax legislation.

If transactions and other events are recognized in profit or loss, their related tax effects are also recognized in profit or loss. If transactions and other events are directly accounted for in equity accounts, the related tax effects are also directly accounted for in equity accounts. The part of the tax provision that relates to assets directly associated with equity is netted off with the relevant accounts in the equity account group.

While the deferred tax liability is calculated for all taxable temporary differences, deferred tax assets consisting of deductible temporary differences are calculated provided that it is highly likely to benefit from these differences by making future taxable profit.

Calculated deferred tax assets and deferred tax liabilities are netted off in the financial statements.

As the tax rate used in the calculation of deferred tax assets and liabilities, 22% over the temporary timing differences expected to occur in 2018, 2019 and 2020, and 20% over the temporary timing differences expected to occur in 2021 and after (2018: 22%)

**XVII. Funds Borrowed**

Subsequent to their recognition the trading and derivative financial liabilities are measured at their fair values; and all other financial liabilities are measured at their discounted values using effective interest rate method. There are no convertible bonds or any other securities issued.

**XVIII. Shares & Share insurances**

The bank has no shares issued in the current period.

**XIX. Confirmed bills of exchange and acceptances**

Confirmed bills of exchange and acceptances are realized simultaneously with the customer payments and recorded in off-balance sheet accounts as possible debt and commitment, if any. There are no guarantees and acceptances recognized against any assets as of the balance sheet dates

**XX. Government incentives**

As of December 31, 2019, the Bank does not have any government incentives or aids.

**XXI. Segment Reporting**

Since the Bank has the status of a Development and Investment Bank, it does not operate in retail banking, and its business segments are limited to Investment Banking and Treasury Transactions.

## **XXII. Others:**

### **Related Parties**

For the purpose of these consolidated financial statements, shareholders, key management personnel and board members, their families and companies controlled by or affiliated with them, along with associates and jointly controlled entities are considered as related parties under the "Related Party Disclosures" ("IAS 24"). Transactions with related parties are disclosed in the postscript VII of the Section Five.

### **Cash & Cash Equivalents**

"Cash", which is the basis for the preparation of cash flow statements, refers to cash in cash, money in cash and bank checks purchased and demand deposits in banks including the CBRT, and "Cash equivalent asset" is for interbank money market placements and time deposits and securities with an original maturity of less than three months. It is defined as the investments made.

## SECTION FOUR

### Financial Position and Results of Operations

#### I. Equity Items:

The equity amount and the capital adequacy standard ratio were calculated in accordance with the "Regulation on the Equity of Banks" and the "Regulation on Measurement and Assessment of Capital Adequacy of Banks".

The bank's equity amount calculated as of December 31, 2019 is 158,807 TL, and its capital adequacy standard ratio is 52.90%. As of December 31, 2018, the amount of equity is 141,858 TL and the capital adequacy standard ratio is 53.39%.

<b>Debt instruments subject to the provisions of Temporary Article 4 (To be implemented between 1 January 2018 and 1 January 2022)</b>		

In the period of December 31, 2019, the Bank does not have the element subject to temporary application in the Equity calculation and the debt instrument to be included in the Equity calculation.

The main difference between the "Equity" amount given in the equity statement and the "Equity" amount in the balance sheet arises from the general provisions. The portion of general provisions up to 1.25% of the amount subject to credit risk is considered as Contribution Capital in the calculation of the "Equity" amount given in the equity table. On the other hand, operating lease development costs, intangible fixed assets and deferred tax assets, which are tracked under the item of Tangible Fixed Assets in the balance sheet, are taken into account in the calculation of the "Equity" amount as Value Deducted from the Capital.

There is no difference between the balance sheet items, which are taken into account in the equity calculation, and the amounts in the balance sheet and the information table regarding the equity items.

## **II. Credit Risk:**

### **Information on risk concentrations by debtors or group of debtors or geographical regions and sectors, basis for risk limits and the frequency of risk appraisals**

The firms for which loans are provided are grouped in accordance with their capital owners and the limits that the maximum risk that will be provided, are determined based on firm and the capital groups.

Other than grouping in accordance with firms and capital group limits, the Bank does not have a risk reduction or limiting in terms of geographical regions or sectors.

### **Information on determination and distribution of risk limits for daily transactions, monitoring of risk concentrations related to off-balance sheet items per customer and dealer basis**

Risk limits relating to daily transactions are monitored on a daily basis by the related departments and new credit demands are followed by considering open limits, collaterals and other appropriateness conditions.

The risk concentration of the group the bank is involved and the other groups are reviewed on monthly basis and findings related to this issue are presented to the Audit Committee regularly.

Off-balance sheet risk concentrations are followed-up strictly in accordance with the directions of board of directors by Treasury Department.

### **Information on periodical analysis of creditworthiness of loans and other receivables per legislation, inspection of account vouchers taken against new loans, if not inspected, the reasons for it, credit limit renewals, collaterals against loans and other receivables.**

Credit worthiness of debtors is reviewed in case of every limit extension and new credit demands. After the review, the terms and conditions for limit extension or new credit are determined. The credit limits are revised and further collateral is required if the risk level of debtor deteriorates. In this reviewing process, the necessary documentation is gathered in compliance with the legislation.

The customers which apply for account status documents are being rated and the studies related to the revision of the current rating model continue in parallel.

Due to the fact that the ultimate goal of the Bank is to use enhanced approaches based on the internal rating, Loan Risk Loss Database was established in accordance with Basel II norms and data accumulation is carried out regularly.

**Definitions of overdue and impaired elements in accounting practice;**

Receivables delayed more than ninety days from the due date of principal, interest, or both, but not more than one hundred and eighty days, are classified as overdue or impaired receivables.

**Methods and approaches for value adjustments and provisions;**

Methods and approaches for provisions are described in Section Three, Footnote VII. and XIV.

**Regardless of the effects of credit risk mitigation, the total amount of risks exposed after offsetting and the average amount of risks for the relevant period, separated according to different risk classes and types;**

The average amount of credit risks subject to capital adequacy for the period is 223,752 TL.

**Whether the Bank has control limits on the positions held in terms of futures and options contracts and other similar contracts, whether the credit risk undertaken for such instruments is managed together with the potential risks arising from market movements;**

Such transactions, including futures transactions made on behalf of companies in the group, are managed by the treasury department, just like transactions made in favor of other customers, and the potential risks of such transactions arising from market movements are also taken into account by the said department.

The Bank includes derivative products in the controls for concentration risk. The audit committee and senior management are informed in case of any risk-bearing issue.

**Information on whether the Bank decreases the risk by liquidating its forward transactions, options and similar contracts in case of facing a significant credit risk or not**

The Bank did not face any credit risk where liquidating its forward transactions, options and similar contracts would have been required. The regular controls are provided by the related departments in order to indicate any such circumstance.

**Information on whether the indemnified non-cash loans are evaluated as having the same risk weight as non-performing loans or not**

None.

**Information on whether the loans that are renewed and rescheduled are included in a new rating group as determined by the Bank's risk management system, other than the follow-up plan defined in the banking regulations or not; whether new precautions are considered in these methods or not; whether the Bank's risk management accepts long term commitments as having more risk than short term commitments which results in a diversification of risk or not**

None.

**Evaluation of the significance of country specific risk if the banks have foreign operations and credit transactions in a few countries or these operations are coordinated with a few financial entities**

There is no risk that the Bank provided to abroad and there are no any other banking transactions with abroad except for acting as intermediary in import-export transactions. There is no significant credit risk since the Bank's foreign operations and credit transactions are conducted in highly rated international banks. The concentration risk is reviewed periodically for any risk on country and counter bank basis.

**Evaluation of the Bank's competitive credit risk as being an active participant in the international banking transactions market**

As having limited transactions limits among the total transaction volume, the Bank does not have significant credit risk as compared to other financial institutions.

**The Bank's ;**

**a) Share of the top 100 cash loan customers in the total cash loans portfolio**

The share of the top 100 cash loan customers in the total cash loans portfolio of the Bank as of December 31, 2013 is 100%. (December 31, 2018: 100%).

**b) Share of the top 100 non-cash loan customers in the total loan non-cash loans portfolio**

As of December 31, 2013, the share of the top 100 non-cash loan customers comprises 100% of the total non-cash loans portfolio. (December 31, 2018: 100%).

**c) The share of the total cash and non-cash loan balance of the top 100 loan customers in the total assets and off-balance sheet items**

The Bank's total cash and non-cash loans from its top 100 loan customers comprise 100% of the total assets and of the off-balance sheet items totally.

**The Bank's general loan provision for its loans**

The bank provides general loan provision based on the "Regulation on the Principles and Procedures Related to the Determination of the Loans and Other Receivables for which Provisions Shall be Set Aside by Banks and to the Provisions to be Set Aside" which is declared on Official Gazette dated November 1, 2006 and numbered 2633. General loan provision computed as 5 per thousand for loans to small and medium sized enterprises on official Gazette numbered 28879, and 1 per thousand for non-cash loans as of October 08, 2013, for the increases after this date; 1 percent should be used for cash loans and other receivables, 2 per thousand non-cash loans.

As of December 31, 2018, the general loan provision amount allocated by the Bank is TL 4,280 (December 31, 2018: TL 3,869).

**Geographical distribution of risk exposures disaggregated by significant risk classes in important regions; The distribution of risks, which are disaggregated by risk classes, according to sectors or counterparties, and the distribution of all risks by remaining maturities, are explained at least on the basis of the following tables, and if necessary, additional information is available;**

**Information regarding each of the risk classes specified in Article 6 of the Regulation on Measurement and Assessment of Capital Adequacy of Banks.**

There is no credit rating institution or export credit institution assigned in determining the risk weights of risk classes specified in Article 6 of the Regulation on Measurement and Assessment of Capital Adequacy of Banks.

Based on the table below, the total risk amount before and after credit risk mitigation and the amounts deducted from the equity, corresponding to each risk weight defined in Annex-1 of the Regulation on Measurement and Evaluation of Capital Adequacy of Banks

**Risk Ağırlığına Göre Risk Tutarları**

Risk Weight	0%	4%	20%	50%	75%	100%
Amount Before Credit Risk Mitigation						
Amount After Credit Risk Mitigation	454	829	52,035	-	0	226,183

Based on the table below, by sector or type of counterparty; Separately, impaired loan and non-performing loan amounts, value adjustments and provisions, value adjustments during the period and amounts related to provisions are disclosed to the public.

Impaired Loans are the loans deemed to have been impaired due to overdue more than 90 days as of the end of the reporting period or due to their credibility. A "Special Provision" calculation is made for these loans within the scope of the Provisions Regulation.

**Miscellaneous information by key industries or type of counterparty**

**Risks included in the circular capital buffer calculation;**

The geographical distribution of the receivables from the private sector, which is taken into account in the calculation of the circular capital buffer specific to the bank within the scope of the Regulation on Capital Protection and Circular Capital Buffers and its sub-regulations published in the Official Gazette dated 5 November 2013 and numbered 28812, is explained in the table below.

The circular capital buffer rate specific to the bank is a rate to be notified by the BRSA, provided that it is disclosed to the public at least 1 year before, and such a notification has not been made yet. However, almost all of the risk items of the Bank are comprised of in-country risks and there is no concentration on country risk basis.

### **III. Foreign currency exchange risk**

**The currency risk that the Bank is exposed to, the estimation of the effects of this situation, the limits determined by the Board of Directors for the positions monitored daily**

The Standard Method used in legal reporting is used to measure the currency risk that the Bank is exposed to.

While calculating the capital requirement for currency risk, all foreign currency assets, liabilities and forward transactions of the Bank are taken into consideration. Net short and long positions are calculated in terms of Turkish Lira equivalent of each currency. The position with the largest absolute value is determined as the base amount for the capital obligation. The capital requirement is calculated over this amount.

The Board of Directors audits daily whether the positions related to currency risk are within the limits.

**The extent of hedging foreign currency debt instruments and net foreign currency investments with hedging derivative instruments, if significant**

As of December 31, 2019, the Bank does not have any derivative instruments classified for hedging purposes.

**Foreign currency risk management policy**

The risk policy is based on transactions within the limits, and it is essential to keep the foreign currency position in balance.

In the light of both national legislation and international practices and within the scope of the current equity profile, there is an FX risk management policy for taking positions within the range of lower and upper limits, and there is no speculative position.

**Exposed foreign currency risk**

As of December 31, 2019, the Bank carries a total of TL 29,956 foreign currency closed positions, of which TL 29,956 from the balance sheet closed position.

In the previous period (31 December 2018), the balance sheet of 20,188 TL had a closed position.

The current exchange rate of the Bank, which has been announced to the public for the last five working days backwards from the balance sheet date, is given in the following table:

#### IV. Interest Rate Risk

Due to the changes in the interest rates of the Bank, interest rate risk expresses the loss possibility the Bank may be exposed as a result of the position of the bank related to the financial instruments representing a borrowing whose yield is associated with the interest rate.

The measures which are carried out according to the standard method, are made on monthly basis using the maturity scala.

#### Interest rate sensitivity of assets, liabilities and off-balance sheet items

**V. Securities Position Risk:**

None.

**VI. Liquidity Risk:**

**The responsibilities and structure of the bank's risk capacity liquidity risk management. Reporting the liquidity risk within the bank of the liquidity risk strategy. Information on liquidity risk management, including how its policies and practices are communicated with the board of directors and business lines.**

Liquidity Risk As a result of imbalance in the bank's cash flow. It means the lack of cash or cash inflows at a level and quality to fully and timely meet cash outflows. Liquidity risk may arise from reasons such as the Bank's inability to easily convert its positions in assets to cash due to its market structure or irregularities in cash inflows and outflows.

It is ensured that maturity match is ensured between assets and liabilities. Liquid values are preserved in order to fully meet the liquidity need that may arise as a result of market fluctuations.

The liquidity of the bank is monitored daily. In addition to the legally defined liquidity ratios, a daily liquidity definition and limit determined with the approval of the Board of Directors has been created. The minimum level for the ratio of liquid assets to total assets is determined as 5%. Daily prepared liquidity reports are reported to the relevant units and senior management.

In addition, the Bank has determined an optional Cumulative Net Liquidity Deficit Limit. Cumulative Net Liquidity deficits; Through the Liquidity Risk reports prepared by the Financial Control Department; It is calculated weekly by the Risk Management Department.

It is aimed to have a positive (+) total net liquidity deficit in all currencies and its ratio to all assets to be at least 20%.

If this ratio calculated by the Risk Management Department is 20% and above, no reporting or notification is made on a weekly basis. Only the Audit Committee meetings are shared as of the most recent date. In case of falling below this limit, the Treasury Department and the General Manager are informed by the Risk Management Department.

**Information on the degree of centralization of liquidity management and funding strategy and the functioning of the bank and its partnerships**

None

**Information on the bank's funding strategy, including policies regarding the diversity of funding sources and durations**

In addition to meeting its short-term liquidity needs from its own internal resources, the Bank. Considering its funding and liquidity needs, most of its liquidity needs are met from its own internal resources, demand borrower funds and overnight borrowing from domestic banks.

The Bank evaluates its liquidity, which consists of demand funds, which are kept by its direct shareholders and partnerships and cash loan customers, called the Borrower Fund and its own internal resources, mostly as a revolving short-term loan and overnight placement.

In accordance with the "Regulation on the Calculation of the Liquidity Coverage Ratio of Banks" published by the BRSA in the Official Gazette dated 21 March 2014 and numbered 28948, in the calculations to be made by banks as of January 1, 2016, the liquidity ratio is at least 50% for foreign currency and at least% for the total. It should be 70.

**Information on liquidity management in currencies that constitute a minimum of five percent of the bank's total liabilities**

Almost all of the bank's total liabilities are in Turkish Lira, US Dollar and Euro. Turkish Lira resources mainly consist of other items such as equity and provisions. FX resources are mainly composed of borrower funds. USD is predominantly in FX liabilities. The Bank properly maintains a balance between the existence of Liquidity Ratios, which must be kept separately for foreign currency, and an asset and liability for liquidity risk management.

The bank maintains a high quality active buffer to meet possible fund outflows.

**Liquidity risk mitigation techniques used**

**Description of the use of the stress test**

As of the end of the year, stress tests are applied in line with the scenarios determined on the basis of universal, particular and reverse stress tests (taking into account the scenarios determined by the BRSA).

**General information on liquidity emergency and contingency plan**

In the bank; There is a Liquidity Emergency Action Plan that has come into force with the approval of the Board of Directors, and the purpose of this plan is to diagnose the possible crisis in time in case of a possible liquidity shortage and to end the crisis with the lowest cost as soon as possible by taking action.

Bank's unconsolidated foreign currency and total liquid coverage ratios are explained below by specifying the weeks.

**Current Period - 31/12/2019**

Week	FC Liquidity Coverage Ratio	Total Liquidity Coverage Ratio	
04.10.2019		21.02	FC lowest rate
27.12.2019		21.02	FC highest rate
29.11.2019	17.36		Total lowest rate
22.11.2019	23.54		Total highest rate
Quarterly Average Liquid Coverage Ratio calculated weekly	19.83	18.86	

**Previous Period - 31/12/2018**

Week	FC Liquidity Coverage Ratio	Total Liquidity Coverage Ratio	
05.10.2018		69.29	FC lowest rate
30.11.2018		91.44	FC highest rate
12.10.2018	16.72		Total lowest rate
30.11.2018	40.80		Total highest rate
Quarterly Average Liquid Coverage Ratio calculated weekly	23.99	68.78	

The average of the liquidity coverage ratio calculated by taking the weekly simple arithmetic average for the last three months is shown in the table below.

**Liquidity Coverage Ratio:**

**Important factors affecting the liquidity coverage ratio result and the change in the items taken into account in the calculation of this ratio over time**

The Bank makes the said ratio calculation in accordance with the Regulation on the Calculation of the Liquidity Coverage Ratio of Banks published in the Official Gazette dated 21 March 2014 and numbered 28948. Among the items considered as high quality liquid assets in accordance with the aforementioned regulation; mainly consists of cash assets and provisions accounts held with the CBRT and securities portfolio. Important factors affecting the liquidity coverage ratio result; are the placement and borrowing items made in the interbank market.

Considering the banks' current status and staying below the legal limits, the BRSA envisages a gradual transition to deposit banks for legal rates, while this rate was decided to be applied as zero percent for development and investment banks until otherwise determined by the BRSA's letter dated 5 January 2017.

**What items consist of high quality assets**

The Bank's high quality liquid assets, Cash and Effective assets, accounts at the CBRT and T.C. It consists of Government Debt Securities issued by the Treasury.

**Which items the fund resources consist of and their concentration in all funds**

The bank's funding resources consist of 88% of its own internal resources, 8% of borrower funds, 4% of bank debts and other items.

**Cash outflows arising from derivative transactions and information on transactions that may define collateral**

Although derivative transactions generate a low amount of net cash flow in terms of total liquidity coverage ratio, they mainly consist of forward foreign exchange transactions with a value date of up to two days.

**Information regarding other cash inflow and outflow items included in the liquidity coverage ratio calculation but not included in the public disclosure template and considered to be related to the bank's liquidity profile**

In the calculation of Liquidity Coverage Ratio, in the public disclosure template; Other Unsecured Debts line; Borrower Funds, Taxes Payable, Miscellaneous Debts, Overnight money received from banks, Import Transfer Orders accounts, Other irrevocable or conditionally revocable off-balance sheet debts line; Unsecured receivables line from letters of guarantee given to customers; It consists of accounts with domestic and foreign banks, cash loans and other accounts that generate cash inflows and outflows.

(\*) Other active accounts such as fixed assets, subsidiaries and subsidiaries in cash, prepaid expenses and non-performing receivables, which do not have the chance to turn into cash in a short time required for the continuation of banking activities, are recorded here.

(\*\*) Certain assets on the balance sheet that are necessary for the banking operations but not convertible into cash in short period such as tangible assets and prepaid expenses are included in this column.

## VII. Leverage Ratio Risk

Information on the leverage ratio calculated in accordance with the Regulation on Measurement and Evaluation of Banks' Leverage Level published in the Official Gazette No. 28812 dated 5 November 2013 is as follows.

There is no significant difference between current and previous period leverage ratio.

Since the Bank is not obliged to prepare consolidated financial statements, a summary comparison table of the total asset amount and the total risk amount included in the consolidated financial statements prepared in accordance with TAS has not been prepared.

### Leverage ratio public disclosure template:

On-balance sheet assets	Current Period	Previous Period
On-Balance Sheet Assets	176,479	156,650
(Assets deducted from capital)	(552)	(391)
Risk amount on On-Balance Sheet Assets	175,927	156,259
<b>Derivative financial instruments and credit derivatives</b>	-	-
Replacement cost of derivative financial instruments and credit derivatives	-	-
Potential credit risk amount of derivative financial instruments and credit derivatives	-	-
Total risk of derivative financial instruments and credit derivatives	-	-
<b>Securities or commodity covered financing transactions</b>	-	-
Risk amount of securities or commodity-covered financing transactions of securities or commodity financing transactions (except balance sheet)	-	-
Risk amount arising from intermediated transactions	-	-
Total risk amount related to securities or commodity covered financing transactions	-	-
<b>Off-Balance Sheet Transactions</b>	-	-
Gross nominal amount of off-balance sheet transactions	164,941	148,838
(The adjustment amount arising from the multiplication with the loan conversion rates)	-	-
Total risk of off-balance sheet transactions	-	-
<b>Capital and total risk</b>	-	-
Capital	154,617	138,105
Total risk amount	340,868	305,097
Leverage ratio	-	-
Leverage ratio	% 45.38	% 45.28

\* Three-month average amounts.

**VIII. Fair values of financial assets and liabilities :**

	Book Value*		Fair Value*	
	Current Period	Previous Period	Current Period	Previous Period
<b>Financial Assets</b>	<b>164,724</b>	<b>156,945</b>	<b>164,724</b>	<b>156,945</b>
Interbank Money Market Placements	2,501	36,695	2,501	36,695
Banks	70,694	25,639	70,694	25,639
Financial Assets Available-for-Sale	160	7,959	160	7,959
Investment Securities Held-to-Maturity	14,080	-	14,080	-
Loans	77,289	86,652	77,289	86,652
<b>Financial Liabilities</b>	<b>1,631</b>	<b>5,270</b>	<b>1,631</b>	<b>5,270</b>
Bank Deposits	-	-	-	-
Other Deposits	-	-	-	-
Other Fundings	-	5,261	-	5,261
Securities Issued	-	-	-	-
Miscellaneous Payables	1,631	9	1,631	9

\* Due to the fact that calculation of book value and fair values very close to each other, the table has been shown from amortized costs.

Fair values of investment securities held-to-maturity are derived from market prices or in case of absence of such prices, market prices of other securities quoted in similar qualified markets and having substantially similar characteristics in terms of interest, maturity and other conditions.

Fair values of loans are calculated discounting future cash flows at current market interest rates for fixed-rate loans. The carrying values of floating-rate loans are deemed a reasonable proxy for their fair values.

Fair values of other financial assets and liabilities are represented by the total of acquisition costs and accrued interest income.

**IX. Transactions carried out on behalf of customers, items held in trust :**

The Bank does not provide buying, selling and custody services and management and advisory services in financial matters for its customers.

## **X . Public Disclosures on Risk Management by Banks<sup>1</sup>**

### **1. Risk Management Approach and Weighted Risk Amounts**

The footnotes and related explanations prepared in accordance with the "Communiqué Regarding Risk Management by Banks" published in the Official Gazette numbered 29511 on 23 October 2015 and put into effect as of 31 March 2016 are given in this section.

#### **1.1 The Bank's Risk Management Approach**

In a framework that can be summarized as "a conservative structure and low risk appetite", the risk management approach of the Bank is stated in the table below (Table GBA):

**Table GBA: THE BANK'S RISK MANAGEMENT APPROACH 2019**

##### **a) How the Business Model determines the Bank's risk profile**

The Bank determines, measures and evaluates the risk profile in line with the principles included in the following procedures:

- Risk Strategy and Policies
- Market Risk Strategy and Policies
- Liquidity Risk Strategy and Policies
- Credit Risk and Counterparty Risk Strategy and Policies
- Operational Risk Strategy and Policies
- Reputation Risk Strategy and Policies
- Interest Risk Strategies and Policies
- Country Risk Strategies and Policies
- Bank's Strategic Plan

Key risks table determined by Self-Assessment (RCSA) studies at our Bank is renewed every year and kept up-to-date. The Self-Assessment study is carried out with all units of the bank. Additional applications are carried out under the name of "IT Risk Management Studies" with the IT Department. In line with the low risk appetite strategy included within the scope of the ISEDES reports approved by the Board of Directors, the actions to be taken regarding the management of these risks are shared at the Audit Committee meetings and planning is made in line with the decisions taken. "

##### **b) Risk Management Structure**

Risk management system; The policies, implementation procedures and limits determined to monitor, control and change the risk-return structure of the bank's future cash flows, the nature and level of the activities accordingly, and to ensure that the risks exposed are identified, measured, monitored and controlled. It is the set of processes. Risk Management Activities mainly;

1. Measuring risks,
2. Monitoring of risks,
3. Controlling and reporting of risks.

These activities are carried out in accordance with the Risk Management Department Regulation and Risk Strategy and Policies.

<sup>1</sup> 23 Ekim 2015 tarihinde 29511 sayılı Resmi Gazete'de yayımlanan ve 31 Mart 2016 tarihi itibarıyla yürürlüğe giren "Bankalarca Risk Yönetimine İlişkin Kamuya Yapılacak Açıklamalar Hakkında Tebliğ" uyarınca

**c) Practices related to spreading risk culture**

Operational Risk Bulletin: Trainings are organized in necessary periods to establish operational risk awareness and raise existing awareness. An Operational Risk Bulletin is prepared every 6 months, and it is published and shared on a platform accessible to the entire bank.

RCSA (Self-Assessment) Studies: Since the RCSA (Self-Assessment) approach, which is applied once a year, involves business unit managers in the process of determining and analyzing the risk profile, it ensures a better understanding of the concept of operational risk throughout the organization, the spread of the risk culture and the risks throughout the Bank. allows to be followed and analyzed.

Activities within the Scope of Business Continuity: Measuring the effectiveness of ISM in ensuring the continuity of business in the event of a real disaster and meeting the needs of our Bank in extraordinary situations with the tests performed once a year at the Dilerbank Business Continuity Center (ISM) and the Business Impact Analyzes applied continuously. It is aimed to be prepared and to ensure adequate risk awareness. Limiting practices have been established at certain rates on the basis of each risk type in our bank. Compliance with these limits is monitored primarily by business units, internal control and internal audit processes, and also by the Risk Management Department.

**d) Risk measurement systems and main elements**

Due to the narrow portfolio volume and the lack of wide range of transactions in our bank, standard approaches (basic indicator approach for operational risk) are considered sufficient on the basis of all risk types and there is no hurry to switch to internal models. However, the necessary infrastructure studies for the transition to advanced measurement approaches are continuing in parallel.

**e) Risk reporting to the Board of Directors and senior management**

Audit Committee meetings are held quarterly and the final results regarding the evaluations made over the entire portfolio are shared. A special report on Risk Management Department activities is submitted annually. Reporting and presentation of support services received annually is made to the Board of Directors. The Audit Committee reports the activities of the internal systems to the Board of Directors every 6 months. Studies within the scope of Business Continuity, studies within the scope of Self-Assessment and studies within the scope of Information Technologies Risk Management are reported and submitted to the Board of Directors. The Risk Management Department reports daily liquidity and stop-loss limits to the senior management.

**f) Stress test studies**

At our bank, stress tests are conducted in general and related risk types once a year. With these universal and particular stress tests, the Bank obtains and evaluates results that make it possible to see the future better.

**g) Risk-reducing processes and strategies**

The Bank exhibits a proactive approach in all risk types. Measures to be taken are monitored through internal risk measurements. There are Emergency and Contingency Plans in important risk categories and for the Bank in general, and necessary studies are carried out periodically to make these plans living. Other processes that can be called "risk mitigation process" in our bank are our Bank's internal control and internal audit processes. The possibility of exposure to risks is substantially reduced by the internal controls applied by the Bank's Internal Control Department and periodic internal audits.

**1.2 Risk-weighted amounts overview**

As of 31/12/2019, the risk-weighted amounts and capital requirement are presented in the table below (Template GB1).

		Risk Weighted Amounts		Minimum Capital Requirement

**3. Issues to be disclosed to the public regarding credit risk**

**3.1 General information on credit risk**

**3.1.1. General qualitative information on credit risk**

Credit risk refers to the failure of the counterparty to fulfill its obligations in the contracts to which the Bank is a party, and the risks and losses that the Bank will face.

In accordance with the legislation, risk limits are allocated according to the financial status and loan needs of the loan customers within the framework of the lending authority limits of the Board of Directors. If deemed necessary, the limits can be changed by the Bank.

The Bank monitors the debtors of its loans and other receivables in terms of their credit worthiness in accordance with the relevant legislation. In addition, it checks the account status documents for the opened loans and updates them when necessary. In accordance with the relevant legal regulations, the Bank; It also monitors risk limitations on the basis of debtors and debtors groups.

The Bank uses a credit rating system to measure and evaluate credit risk effectively. The rating system evaluates the total credit risk of each borrower. If there is any collateral taken to reduce the credit risk, the Bank performs the valuation of these collaterals at the first collateral stage and at least once a year after taking into account the results of the risk rating system.

The bank monitors and manages credit risks until the loan repayment is completed, the loan is canceled or deleted after the loan is granted.

General qualitative information regarding the credit risk of the bank is as follows with Table KRA:

**Table KRA: General Qualitative Information on Credit Risk 2019**

**a) Business model of the bank and its credit risk profile components**

Although our bank's portfolio mainly consists of credit risk, it does not experience any significant problems in risk monitoring with effective risk management approaches and control mechanisms; Its high capital adequacy ratio continues its existence as a strong player in the sector.

The components of credit risk in our bank are defined as follows; its coverage is predominantly in the form of base credit risk.

Credit risk; It expresses the probability of loss to be incurred by the bank due to the failure of the loan customer to fulfill its obligations partially or completely on time by not complying with the terms of the contract.

Counterparty risk, country risk, concentration risk, residual risk are also handled and managed in the credit risk category.

Counterparty Risk: It refers to the probability that the counterparty, which is the addressee of a transaction that imposes an obligation on both parties, will default before the last payment in the cash flow of this transaction.

Country Risk: It refers to the probability of the bank to suffer a loss as a result of the debtors' failure or avoidance of fulfilling their external obligations due to uncertainties arising in economic, social and political conditions.

Concentration Risk: It is the risk arising from the concentration of loans within the personal loans portfolio, on the basis of certain sectors and in a certain geographical region.

Residual Risk: Covers the risks arising from the ineffectiveness of the credit risk mitigation techniques used.

**b) Approaches used in determining credit risk policy and credit risk limits**

Our bank is managed in an extremely conservative structure with the aim of minimum risk. Since risk items mainly consist of credit risks, there is no concentration in a certain sub-risk group, but some internal limits are set for qualified monitoring. These limits are as follows:

**Sectoral Concentration Limit:**

Since concentration on a sector basis is not very desirable, it is followed whether the total loan volume (other than group companies) causes more than 25% concentration in the total portfolio in a sector. If the rate of 25% is reached, the risk level of the situation that occurs in the first Audit Committee and the action to be taken are evaluated and the decisions taken are implemented.

**Counterparty limit:**

Counterparty limits are established in accordance with the rules and application procedures on loan issuance and taking into account the change in the financial position of the counterparty. Counterparty limits are determined only for counterparties trading in domestic and foreign secondary markets. Counterparty limits prepared by the Treasury Department are submitted to the Board of Directors for approval.

**c) Structure and organization of credit risk management and control function / d) Relationship between credit risk management, risk control, legal compliance and internal audit functions**

In our bank, credit evaluation stages are carried out by the Head Office in person and disbursements are made with the approval of the Board of Directors. Each of our Bank's customers is subjected to an internal rating model, and these evaluation results are taken into account during the evaluation of loan offers. Implementation of the credit rating system is carried out by the Credit Operations Unit, and its maintenance and follow-up is carried out with the cooperation and coordination of the Risk Management Department and the Credit Operations Unit. The Risk Management Department also prepares a monthly report in which it evaluates the entire loan portfolio and presents it at the Audit Committee meetings. All operational sub-steps of the lending processes are carried out by the Loans Department. The lending process is monitored effectively together with the audit and control works of our Bank's internal control and internal audit units.

**e) Credit risk reporting to senior management and board members**

Within the scope of legal reporting, measurement is carried out on a monthly basis by applying the standard approach and the simple method in guarantees.

As part of the internal practice, Credit Risk Evaluation Reports are prepared monthly, and the most up-to-date report is evaluated at the Audit Committee meetings held every 3 months. Transfers within the scope of early warning, if any, are made by the Risk Management Department.

Loan Risk Loss Database entries are regularly made in order to provide the infrastructure that enables transition to advanced modeling in credit risk measurement approaches.

**2.1.2. Credit quality of assets**

The asset quality of our bank and the amounts valued in accordance with TAS in the financial statements prepared in accordance with legal consolidation, prepared for the purpose of comprehensively revealing the credit quality of the bank assets are presented in the following table (Template CR1):

		Gross Amount prepared according to Legal Consolidation and valued in accordance with TAS consisted within financial tables		Provisions / depreciation and impairment	Net Value
		Defaulted	Not Defaulted		
1	Loans	1,201	171,977	1,201	171,977
2	Debt Instruments	-	-	-	-
3	Off-balance sheet receivables	-	173,607	-	173,607
4	<b>Total</b>	<b>1,201</b>	<b>345,584</b>	<b>1,201</b>	<b>345,584</b>

**2.1.3. Changes in the stock of defaults and debt securities**

The final situation on the bank's default receivables and debt instruments is presented in the following table (Template CR2):

Changes in the stock of defaults and debt securities		
1	Default loans and debt instruments at the end of the previous reporting period	1,201
2	Loans and debt instruments that have defaulted since the last reporting period	-
3	Receivables that have not defaulted again	-
4	Amounts written off	-
5	Other changes	-
6	Default loans and debt instruments at the end of the reporting period (1 + 2 + 3 + 4 + 5)	1,201

In accordance with the Communiqué on receivables that have fallen into default; It refers to the amount before the provision / depreciation and impairment are taken into account for the receivables in default (excluding those that are written off from assets).

**2.2. Credit risk mitigation**

**2.2.1. Qualitative requirements to be disclosed to the public regarding credit risk mitigation techniques**

The Bank considers the cash flow of the activity or investment subject to credit in the lending process as its primary repayment source.

Calculation of the collateral amount is based on margins determined by market and currency risk. Standard margins applied throughout the bank are specific to the type of collateral and can vary depending on the type of loan, maturity and currency used.

If the loan is established with a guarantee condition, the collaterals must be entered into the Banking system. These transactions are carried out centrally by the Credit Operations Unit.

The current value of the collateral is monitored in terms of collateral type. In the credit risk monitoring process, besides the credit worthiness of the customer, the collateral-risk balance is checked.

**2.2.2. Credit risk mitigation techniques**

There is no credit risk mitigation technique currently in use. Therefore, Tables were not prepared.

**2.3. Credit Risk Using Standard Approach**

**2.3.1. Qualitative Explanations Related to the Rating Grades Used**

The Bank considers the external rating only for receivables from central governments or central banks, and within the scope of country rating assignment. Details are as follows as presented in Table CRD:

**2.3.2. Exposed credit risk and credit risk mitigation techniques**

Credit risks and risk-weighted amounts calculated under the standard approach are presented in the following table (Template CR4):

	Risk Classes	a		b		c		d		E		f	
		On Balance Sheet	Off-Balance Sheet	On Balance Sheet	Off-Balance Sheet	Risk Weighted	Risk-weighted amount density						
1	Receivables from central governments and central banks	917	-	917	-	676	0,29%						
2	Receivables from regional governments and local governments	-	-	-	-	-	-						
3	Receivables from administrative units and non-commercial enterprises	-	-	-	-	-	-						
4	Claims from multilateral development banks	-	-	-	-	-	-						
5	Receivables from international organizations	-	-	-	-	-	-						
6	Receivables from banks and brokerage houses	75,211	-	75,211	-	32,787	13,86%

16	Stock investments	-	-	-	-	-	-	-	-	-	-	-
17	Other receivables	213						4,106				
18	<b>Total</b>	<b>454</b>		<b>52,035</b>				<b>226,183</b>				<b>4,319</b>

**2.4.2.** Since the Internal Rating Based (IRB) approach is not used in our Bank, Tables CRE, CR6, CR7, CR8, CR9, CR10 template numbers have not been prepared.

**2.5. Disclosures regarding the counterparty credit risk (CCR)**

This part; It covers all risks exposed to counterparty risk in trading and banking accounts, credit valuation adjustments and central counterparty risks.

**2.5.1 Evaluation of CCR according to measurement methods**

The table (Template CCR1) detailing the methods and parameters used in measuring the legal capital to be held for CCR is presented below:

	a	b	c	d	e	F
	Renewal Cost	Potential Credit Risk Value	EBPRT	Yasal Risk Tutarının Hesaplanması için Kullanılan Alfa	Alpha Used to Calculate Legal Risk Amount	Risk Weighted Amounts
1 Standard approach-CCR (for derivatives)	-	-	-	1,4	-	-
2 Internal Model Method (for derivative financial instruments, repo transactions, securities or commodity lending or borrowing transactions, long settlement period transactions and margin trading)	-	-	-	-	-	-
3 Simple method used for credit risk reduction - (for repo transactions, securities or commodity lending or borrowing transactions, transactions with long clearing times and margin securities transactions)	-	-	-	-	-	-
4 Comprehensive method for credit risk mitigation - (for repo transactions, securities or commodity lending or borrowing transactions, transactions with long clearing times and margin trading)	-	-	-	-	-	-
5 Value at risk for repurchase transactions, lending or borrowing securities or commodities, transactions with long clearing times and margin trading	-	-	-	-	-	-
6 Total	-	-	-	-	-	-

**2.5.2. Capital requirement for credit valuation adjustments (CVA)**

Template CCR2 has not been prepared because the CVA calculation situation has not occurred.

**2.5.3. CCR according to risk classes and risk weights**

The risk classes and risk weights of counterparty credit risks calculated within the framework of the standard approach are presented in the following table (Template CCR3):

Risk Weight	0%	10%	20%	50%	75%	100%	150%	Others	Total Credit Risk
<b>Risk Classes</b>									
Receivables from central governments and central banks									
Receivables from regional governments and local governments	-	-	-	-	-	-	-	-	-
Receivables from administrative units and non-commercial enterprises	-	-	-	-	-	-	-	-	-
Claims from multilateral development banks	-	-	-	-	-	-	-	-	-

<b>Total</b>	-	<b>829</b>	-	-	-	-

**2.5.5. Credit Derivatives**

KKR6 template has not been prepared as there are currently no credit derivatives.

**2.5.6. Issues to be disclosed regarding the risks to CCP**

Since there is no risk in this context, the CCR8 template has not been prepared.

**2.6. Issues to be disclosed to the public regarding securitization**

MKA, MK1, MK2, MK3, MK4 templates were not prepared as required by the Communiqué on Public Disclosures on Risk Management by Banks.

**3. Issues to be disclosed to the public regarding Market Risk**

**3.1. Qualitative information about market risk to be disclosed to the public**

In order to comply with the regulations, the Bank has regulated its activities related to market risk management within the framework of the Regulation on Internal Systems of Banks and Internal Capital Adequacy Assessment Process published in the Official Gazette No. 29057 dated 11 July 2014.

Market risk management activities in the Bank include the measurement of the risks exposed due to price, interest and exchange rate fluctuations in financial markets. Monthly reports prepared within the framework of the legislation published by the BRSA are prepared and sent by the Risk Management Department. In 2019, only a small amount of commodity risk capital obligation was calculated as of the end of January, and apart from this, no capital obligation was incurred due to the lack of a position to require calculation for stock, commodity and clearing risk within the scope of the Bank's activities.

Taking into account the limits determined within the scope of Market Risk Strategy and Policies, risk measurements and daily limit controls are performed. Treasury Department and Bank senior management are informed about the control results.

Stress tests are applied at specified periods throughout the year and the stress tests performed on an annual basis in line with the relevant legislation are reported to the BRSA within the period.

General qualitative information regarding the market risk of the bank is as follows with the Table PRA:

**Table PRA: Qualitative Information to be Disclosed to the Public on Market Risk 2019**

**a) Bank's processes and strategies**

Market risk management activities in our Bank are carried out by the Risk Management Department, Market Risk Unit, according to the processes in the following sub-headings:

**1. Measuring, evaluating and monitoring market risk**

As regards the measurement of market risk, the standard approach is currently applied. Legal reporting on the subject is also made on a monthly basis. Although the use of the internal model is not on the agenda yet, it is planned to be on the agenda in the future.

**2. Reporting of market risk**

Within the scope of legal reporting, measurement is carried out on a monthly basis by applying a standard approach. The form regarding the Interest Risk Arising from Banking Accounts (FR400) is prepared and sent monthly in this context.

Daily liquidity and stop-loss limit monitoring and cumulative net liquidity deficit limit monitoring are performed within the scope of the in-bank application. Weekly liquidity and monthly interest sensitivity analyzes are performed. Any transfers within the scope of early warning are made by the Risk Management Department at the relevant Audit Committee meeting.

Daily valuation figures for the Purchase-Sale Portfolio are followed up with the data received from the system. In this context, the Market Risk Unit reports to the Risk Management Department Manager on the first business day following. If a situation that should be considered within the scope of early warning is detected, a meeting is organized with the General Manager and Treasury Manager. According to the result of the meeting, the matter is included in the agenda of the Audit Committee, if necessary, and an action plan is prepared and implemented according to the decisions taken.

**b) Organization and structure of the market risk management function**

"In our Bank, activities regarding market risk are carried out by the Risk Management Department Market Risk Unit within the scope of legal reporting, measurement and monitoring. The Treasury Department is active in liquidity and market monitoring and plays a critical role in informing the senior management. As in all processes, the audit and control processes are performed by our Bank's internal audit and internal control units.

**c) Structure and scope of risk reporting and / or measurement systems**

Within the scope of legal reporting, measurement is carried out on a monthly basis by applying a standard approach. The form regarding the Interest Risk Arising from Banking Accounts (FR400) is prepared and sent monthly in this context.

Daily liquidity and stop-loss limit monitoring and cumulative net liquidity deficit limit monitoring are performed within the scope of the in-bank application. Monthly liquidity and interest sensitivity analyzes are performed. Any transfers within the scope of early warning are made by the Risk Management Department at the relevant Audit Committee meeting.

Daily valuation figures for the Purchase-Sale Portfolio are followed up with the data received from the system. In this context, the Market Risk Unit reports to the Risk Management Department Manager on the first business day following. If a situation that should be considered within the scope of early warning is detected, a meeting is organized with the General Manager and Treasury Manager. According to the result of the meeting, the matter is included in the agenda of the Audit Committee, if necessary, an action plan is prepared and implemented according to the decisions taken.

Since the internal model is not used, Table PRB is not arranged.

### 3.2. Standard Approach

The components of the capital requirement for market risk under the standard approach are presented in the following table (Template PR1):

		A
		RAT
<b>Direct cash products</b>		
1	Interest rate risk (general and specific)	0
2	Stock risk (general and specific)	-
3	Currency risk	29,263
4	Commodity risk	-
<b>Options</b>		
5	Simplified approach	-
6	Delta-plus method	-
7	Scenario approach	-
8	Securitization	-
9	<b>Total</b>	<b>29,263</b>

(\*) PR2, PR3, PR4 templates were not prepared since the internal model approach is not used in our bank.

### 4. Issues to be disclosed to the public regarding operational risk

Operational risk calculations at our Bank are carried out within the scope of Basic Indicator Approach. The figures calculated as of the end of 2019 are presented in the table below:

	2019 Value	2018 Value	2017 Value	Ratio to Gross Income (%)	Ratio to Gross Income (%)	Ratio to Gross Income (%)
Gross Income	17,260	16,351	21,263	18,291	15	2,744
Annual Surplus Operational Risk Capital (000 TL)						<b>34,296</b>

### 5. Issues to be disclosed to the public regarding the interest rate risk in banking accounts

In the table below; The economic value differences arising from the fluctuations in interest rates, calculated in accordance with the "Regulation on Measurement and Evaluation of Interest Rate Risk Arising from Banking Accounts by Standard Shock Method", divided according to different currencies of the bank, are presented:

## SECTION FIVE
